MARINA YACHT HARBOR, WEST HARBOR RENOVATION
PROJECT WORKING GROUP

MISSION STATEMENT

Group's Role

Provide the design team with:

- Input on complex technical design issues from the 'end-user's' perspective;
- Assistance with the dissemination of information to other boaters on the technical and theoretical details guiding the course of the design's development; and
- Assistance in the planning and implementation of the project in areas that impact boaters and other harbor users.

Group's Goal

Provide assistance to the project team to insure that the project achieves the following objectives:

- Results in a facility that meets the needs of current users, yet is flexible enough to meet the needs of future users;
- Results in a facility that is ideally suited given the specifics of its location and environment;
- Results in a smooth project implementation process with as little disruption to users as possible, and
- Creates a sense of partnership between the Department and the harbor users that will continue beyond the completion of the Project itself.

Mission Statement
